The House Committees

The best—and the worst—that can be said for Mr (striple a committees). The best—and the worst—that can be said for Mr (striple a committees is that they fairly represent the democratic majorith. As Mr Carlisle it miself is considerably above the average of be party in ability and character. It was hoped that he would so organize the house that the rabe ty would have the benefit of leaders on his own sort, and be able to do as good work as its general composition would admit. But Mr Carlisle, though better in many regards that his party, had not the firmness or the aggressia courage necessary to realize this hope, and the has given us a set of committees that leve as a rule, little but negative ment.

DEMAGOGIC METHODS Et The Congressional Lever from day today, many pages are devoted to lists of new bills
They often run into the bundreds, and relaifs to
every subject from the prisidential succession

The purpose of their introduction is to gate an appearance of activity on the part of demagon o genature and representatives for personal and political sifect of home

The insincerity of their introduct m is shown in many instances by the character of the bills themselves. They relate in thousands of cases appropriations, which are no made in this way but through a regular order, after leing was but through a regular oreu, and song formulated by a special committee. To introduce into the senate a bill appropriating money for Coos bay, Yaquina bay, or the Columbia river improvement, is the baldest nonsense, as all persons familiar with congressional methods well know. There is not the slightest chance of

J. E. Stauft presented an oil painting of a scene on the plains of Wyoming. In the foreground stands an Indian burial patform on which rests the body of a brave in his last repose. In the distance looms the Rocky mountain range, below which the sun has just sunk, the sky glowing in the glerious has just sunk, the sky glowing in the glerious has of sunset.

E. Straw measured an oil painting represent-

the sky glowing in the glorious huss of sunsat.

E. Exper presented an oil painting representing a lady who has fallen asleep on a kunga while reading the paper still in her land. The graceful pose of the figure and the rish coloring of the surroundings are very effective.

R. B. Hapersham exhibited as oil ketch of a wild, rocky stream, on the hank of which a fisherman is falling his well carned repose beside his rod and well filled creet.

C. L. Smith presents a skytch, black and white, in dile, representing an artist who has failen saless? In his chaft before his casel.

A TOREION VISITOR

The Japanese Consul o' New York in the Jity-ilis

Op nion of "The Minade."

Yesterday morning Sah-nin Tin-Ka-An-S ii, the
Japanese tomsed at New York, lace impanied by
his wife, arrived here over the Northern Pacific
and took 190 his at the Esmond. They are en route home for a thort season and will return route noing for a chort sensor and will return to this cognizy about July next. A reporter of THE ORNGONIAN called on the consul a the afternoon and was granted an interfew. The consul, who has been stationed in New Y. rk for four years, speaks, English correctly, and though with the healthney of corriental proper, it consists understood. He had nothing to say on the subset of position the speaking because of the little. states and his country being amicable. Me expressed himself greatly pleased with his knowners being amicable. Me expressed himself greatly pleased with his known continental journey, in which expression his wife joined, and both went later raphy as over Multicomah falls in true American style. "The scenery of the country west of Spokane fulls reminds me very much of the mounts n scenery of my own hand," said, Ta-Ka-Ha-Sh, "and I should like very much to spend a summer here.

If we mistake not, after the great encystorm lest wifer Councillinan Shars introduced an ordinance in the common councill requiring problem that company in New York, and Katisha are very ridicalous. I heard the opera lest clean snow of the sidewalks in front of the premises. The ordinance parsed, and the first movetorm since occurred yesterday morning. Except in a few instances the snow was not cared off of the sidewalks, and in most cases hature was an important factor in design.

Japanese it s not a bit funny. I liked the character of Yiam Yun very well, but Ko-Ko and Katisha are very ridicalous. I heard the opera by the original company in New York, under Sir Arthur Eulivao. The finest thing in it for me was the Japanese song, sung by the chotis. It is real Japanese song, sung by the chotis. It is real Japanese song sung by the chotis. It is real Japanese song sung by the chotis. It is real Japanese song sung by the chotis. It is real Japanese, in both the words and music, and I complimented Sir Arthur on the beautiful arrangement." "Is the Mixao the spiritual adviser of the country "asked the reporter. "No, sir,!" was the answer. "The Mixade is the ruler. Je is the emperor, and reigns superme, and his oldert son will be next alicado. The present ruler is about 38 years old."

The consul and wife are clad in ordinary American garb, and have lived at a prominent hotel in New York. Ta-Ka-Ha-Shi stated that the aristocracy of Japan had fallen considerably into American ways and most of the intelligent families had adopted the English skyle of dinner, though they still served breakfast in hillowed Japanese facilion.

The La-Ha-Shi and wife leave to-morrow for Victoria, festurning in time to catch the San Francisco steamer on the 24th, and sadding for Yokohama on the 3th.

Royal Baking Powder Strongest, Purest, most Economical.

Certain baking powder makers are oublishing pretended analyses and certificutes wherein an attempt is made to compare their haking powder ith the Royal, their obvious purpose wing to counteract the recent expopres of the inferiority of their own . goods arising from their impurity, ow test, and lack of keeping qualities, as shown by the reports of the Government chemists and others.

As to whether any of these haking owders are equal to the "Royal," the ficial tests clearly determine. For nstance, when one of them most rominently advertised was recently ested by Prof. Chandler, it was found o have lost about 28 per cent of its trength since being made. As the trength of this powder when fresh, as ascertained by Prof. Love, late Government chemists, is 14 per cent below that of the "Royal," there is

Stown a superiority in the Royal Baking Powder, in leavening power, of 42 per cent over other brands.

When compared in money value this difference would be as follows:

One b. can of Royal Baking Powders. der worth fifty cents. One lb, can of other brands (sold

tor same price) worth twenty-nine By the use of the Royal Baking lowder, it will thus be seen, there is a saving of nearly one half in cost. But there is also the greater advantage of an assured purity and wholespmeness of food; of bread, biscuit, and cake made perfectly light, sweet, and palatable-advantages not to be

had in the use of a low test, improp-

erly compounded baking powder that

dontains large quantities of lime and

other impurities.

The Royal Baking Powder has the fullest commendation of the most emineut chemists, food analyists, and virters upon Hygiene, for its most remarkable purity and wholesomeness and its high efficiency as a leavening agent. It is not only manufactured from a chemically pure cream of tarture, it is as bona fide as a check with our ar in which no lime exists, but will etain its full leavening strength in all climates and conditions of atmospliene until required for use; merits which no other baking powder can claim ROYAL BAKING POWDER CO.,

Here is alleged in the complaint that between June I, 1881, and the commencement of this action, one 0. T. Billiot wrongfully cut and removed from section II, in towash p. 7 south, of fange 189 and of the Wallamet meridian—the same being then unsurveyed pub ic land—190, 1900 feet of timber, made into saw logs of the value of \$890\, to a steam saw mill in Baker 30.115, Oregon, with intent to dispose of the same, that the defendants, well-knowing the tremises, look presension of said saw logs, then and there being of the value of \$1200, and wrongfully cut the same on said mill into boards, of the value of \$4800, and did then and there convert the same to their own ise, to the damage of the plaintiff \$4800.

On June 2, 1880, the defendants answered separately, denying, substantially, any knowledge of the allegations of the complaint relative to Illiotif cutting and removing 'timber from the public land, and admitting that on and since Oregoe'l, 1882, they each had an interest in the sleam saymill a tuals on or near the section iforesaid, but that about said date it was removed to land belonging to the defendants, and canying that, they were in any way interested in the running of said mill between the time of acquiring said interests therein and its removal, of that they ever took possession of said logs or suwed that same into lumber, or converted the same to their nee. ipo defendant did receive the lumber at the utill and paid for hauling it to Baker City where greenmaby it was disposed of by him and finally converted to his own use.

But he also contends that Elliott, being a will ful trevpassed, the defendant is not only liable for the value of the tumber at the mill including the value of the labor put upon it by Elliott, but for the ful value of the property at any time after it came into his possession and be for this soit was brought for the conversion, which includes of course, the cost of transportation from the mill to Baker City.

The mile for ascertaining the damages in such cases has been a vexed question—the volume, if not the weight of authority, being that the value of the property at the time of conversion or appropriation to he use of the defendant, with interest thereon, constitutes the measure of damages. Hield on Dam., § 792.

But this includes any accession of value between the taking and conversion.

Blackstons (2 Book, 404) says that the rule of the Roman law had been copied and milopled by fraction and confirmed by the courts of hig and, that if arr property receives "an accession y natural or artificial means, as by the growth of vegetables, the pregnancy of animals, the embroidering of cloth or the conversion of wood or metal linto resels and measils, the original owner of the thing was entitled by his right of possession to the former, but if the thing thealt, by such operation, was changed into a different species, as by imaking wine, oil or bread out of another's graples, olives or wheat, it belonged to the new operator, who was only we make satus faction to the former propriator for the materials which he had so converted. "And in Silet ury vs. McCoon (§ N. Y., 379), the court went further and held that when the taking was willfully wrong it matters not that the species has been changed, the wrongloer acquires to property in the article produced, so long as it can be shown that it was made from the material converted—as when corn is made into whi a ratuation Sout le

In that case it was held that in an action to recover damages for timber cut and carried away from the public land, the defendant, if a willful treepasser, is liable for the full value of the property at the time of commencing the soit, without any deduction for any latur or expense bestowed thereon but if he is an gun tentional or kistaken responser, he is only itable for the value of the timber at the time of conversion, less the value of any such labor or expense and that a purchaser from a wilfful treepaster without notice of the wrong of the true ownish p of the properly, is only liable for the value hereof at the time of such parchase and not for any labor or expense he may kestew upon it thereafter. It is admitted flat the defendant our chased the limiter from a wilful trespassor, and is therefore intle to the build states at least for the full value of the same at the time of such purchase. In all cases of Bronchial and Pulmonary Affections is Apple Chiprer Per rotat. As such it is recognized and prescribed by the medical profession, and in many thousands of families, for the most forty years, it has been regarded as an invaluable household remedy. It is preparation that only requires to be taken in very small quantities, and a few dose of it administered in the cury stages of a cold or cough will effect a speedy ou and may, very possibly, save life. There is no doubt whatever that

Has preserved the fives of great numbers of persons, by arresting the development of Lawyngitis, Broneihitis, Pracumonia, and Pulmonary Consumption, and by the cure of those dangerous maladies. It should be kept ready for use in every family where there are children, has the indiction far supernor to all others in the trialment of Croup, the alluctation of Whooping Cough, and the cure of Coldwand Influenza, aliments peculiarly incident in dealing with all diseases of the class is of the ulmost importance. The loss of a single day may its many cases ential faital consequences. Do not waste present time in experimenting with incidence of doubtful efficiency, while the malady is constantly graining at deeps hild, but take at once the speedust and most certain to cute.

LONION, her 27, 1885—"As the bell fuga, the fool thinks." I like the French original of the proverb best. On fant durke aux roches to the proven with "People make the bells say what free navent "People make the bells say what free have on mind." If you have never tried them do so. It will amuse you. Dick Whitington made them say, "Turn again, Whitting ton, three lord mayor of London town." The widow in Rabelais, who consulted the press about marring her journeyman, was told to consult the hells. The priest knew she destree to marry the man who had had her husband" could enter The talks were rongand the widow heard them say, "To take your man, do take you man. When she had married and her husbanh had beaten her, she complained to the priest. He said she is not have misunderstood the bells. He had it im rut g again for her and she distinctly heard it en say, "Do not take blin, do not take hum. In these "hard times" I hope the boliswill say pleasant things to you and free pitter promises, which means that I wish you a prosperous new year. The popular Christmas carches them is a corrose thing, printed on brown promises, which means that I wish you a pros-perous new year. The popular Christmas card this year is a corpoos thing, printed on brown paper, with "Fard Times" as its motto. Bu-looking over my collection, I find that the only lacking over my collection, I find that the only people who have sent these wretched inventions to "not and mine" are well-known rich mean people. In 'nard times' mean people with money make the general depression an exoru-

STRANGE SHOWS.

Lordon is becoming more and more "the show place" of the empire. It is an exhibition of any justice in itself, a city of many attractions but civilization and the enterprising 'mporeur' of are making a sort of international exhibition of it. We are crowded with foreign shows. At kensington we have the Jupanese village. The almoud-eyed strangers are now a familiar feature of West End attractions, and they declare they like London so much they do not mean to leave us. Considering that the metropise has been more or less in a forger darkness for weeks, this liking for the English netropoite is very flattering. It is true the "Jap aneries" is under cover and lighted with gas, and that the native inhabitants have all they con desure in food, clothing and pocket money. They are independent, therefore, of the climate and the albert Phiace with native handleraffers and all that appertance to their eastern world. Opposite the Lat gham hotel is a similar kind of human hive, on a smaller reals, and this includes Indian juggiers, workers in gold and a troupe of Nank's girls. The Aquariam competes with parties of strange tribes from Central Africa, and at the Opera tomogue a company of Parses actions are playing dramas in their coving language.
